

Dear Friends,

What began as a modest collaboration has grown into a decade-long journey of impact, resilience, and shared purpose. **In 2025, Caritas Czech Republic proudly celebrates 10 years since the official launch of its office in Georgia** – a milestone that reflects our deep commitment to supporting communities across the country.

We have worked closely with institutions, civil society, and communities in three key areas:

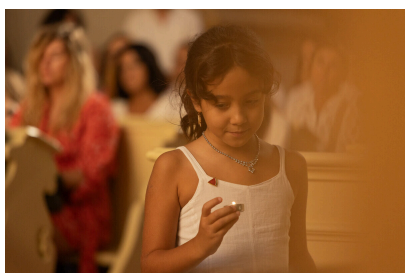

- **Healthcare and social protection** – improving access and services for vulnerable groups
- **Rural development** – supporting inclusive growth, especially in agriculture and livelihoods
- **Environmental protection** – promoting sustainability and climate resilience

We remain committed to serving the most vulnerable and marginalised groups, empowering people to shape a better future. This anniversary is a moment of reflection and gratitude. We thank our donors, partners, and the people of Georgia, whose resilience inspires us – and the people of Czechia, who support us with kindness from afar. **Together, we continue to build lasting change and a fair, resilient society.**

Ekaterine Meskhrikadze
Country Director for Georgia

CARITAS IN GEORGIA

The United Nations has declared a famine in Gaza City, the Israeli army has ordered its evacuation. **The situation is catastrophic and exhausting** – yet we continue to help. We also drew attention to the suffering of children through the event [Light for Lost Childhood](#), which honoured innocent lost lives. Thank you to all who joined.

What does a summer day look like when it's interrupted by an air raid alert? Despite the war, [Ukrainian children tried to enjoy the summer like their peers](#) – **playing, creating, and spending time with family**. Read their stories, full of courage and simple childhood joy.

The climate crisis is changing the lives of farmers around the world – including Everisto from Zambia. Prolonged drought threatened his crops and livelihood. Thanks to support from Caritas, [he learned how to adapt his farming](#) and now grows a wide variety of crops.
